

J. B. TREASURE & Co. Ltd.

CIRCULAR SIGHT GLASS FLANGES

J.B Treasure offers a range of "Circular Sight Glass Flanges" for use as inspection windows in chemical and other process plant.

Standard sizes range from 3" nominal bore to 6" nominal bore manufactured to BS1560 Class 150 specifications. They are generally manufactured from 316 stainless steel although other materials and sizes are available on request. A range of gaskets are available to suit specific applications.

Flanges can be supplied with Borosilicate or Soda Lime type glasses in either annealed or toughened quality. When the flange is to be used with very high temperatures, or in other critical applications then either quartz or fused silica type glasses can be used.
